

Got an **iPhone**? Use **Revit**? Have you ever dreamt of viewing your Revit models on your iPhone when you're on site or at a design team meeting? Well, it's going to happen and the time is now!

The Team over at **goBIM** have an application for the **iPhone** which works in conjunction with a **Revit Exporter**, to load basic files onto your phone. This is going to be a real productivity tool for designers, project managers and contractors.
